## + Personal Objectives

Detail-oriented Frontend Developer with a master degree in Computer Science and 4 years of experience. I am passionate about creating robust, reusable components that enhance user experience and reinforce the company's brand image. I take pride in my ability to meticulously develop websites, ensuring optimal functionality and aesthetic appeal.

## + Skills

### — Programming

React, NextJs, Tailwind, Angular, NGRX, Typescript, JEST, C#, .Net core, PHP, HTML, SCSS, CSS, Django Python, C, C++, Agile methodology

### — Languages

French: native, English: fluent, German: intermediate, Korean: conversational

## + Professional Experience

### — Packative | Seoul

Frontend developer

April 2023 - Now

Creation of a multi-tenant **SASS CRM** using state machines for handling state in **React/Tailwind/Typescript**. Development of a real-time supply chain manager allowing users to follow all the production steps of an item from the design to the shipping of a product using **Reactflow**.

Lead developer for the design and implementation of a new marketplace **server-side rendered** using **NextJs/Typescript**. Development of a live packaging prices calculating system based on various options such as sizes, material, shape... Implementation of an editor allowing customers to have a 3D preview while designing their packaging. Integration of a **CMS** using homemade custom components with interactive **UI/UX** ensuring an easy publishing/writing of blog posts or pages by our marketing team.

Maintenance and development of new features on our previous marketplace using **Angular/Typescript** and **NGRX**.

Used **Playwright** and **Jest** for unit and end-to-end testing.

### — Lucca (HR and Finance software publisher) | Nantes

Software engineer intern

September 2022 - March

2023

Designing and implementing key features for interview management and training request SaaS software using **C#**, **.NET core** framework, and **Angular**. Working in a **Micro-services** architecture environment between the different applications. Use of **NGRX** (Redux equivalent for Angular) as a store system for components and **Jest** for unit testing.

### — Freelance

Frontend developer

September 2020 –

August 2022

Development of web projects as a freelancer for clients. Creation of **Wordpress** websites with **Timber** extension allowing the implementation of **MVC** architecture in **PHP**. Advanced web integration in **HTML** and **CSS**. **React** webapp development.

Examples:

- Raspaldo plastic surgery : <https://www.raspaldo.ch/>
